Technical Cupping Report

Order: Sample roasting, cupping, descriptive sensory evaluation and profiling

Cupping standard: 6g / 100 ml of bottled, still water (Vittel), medium to coarse ground, 10 cups

Quality: Brasil natural Arabica, Cerrado, Fazenda Asahi, Producer Paulo Macamiti Kuniyoshi, Scr. 14/16, strictly soft, fine cup, current crop

Cup Quality:

- Acidity: Low to medium, clean, sweet and juicy, slightly winey/fruity
- Body: Medium, silky
- Flavour: Brown sugar, maple and nuts
- Mouthfeel: Very smooth and mellow
- Cup Uniformity: Homogenous and regular throughout
- Sweetness: Medium to strong
- Overall balanced and smooth
- Clean Cup: Free of any defects

Comment:

The freshness of the current crop is still reflected in the cup due to the presence of slightly winey and fruity acidity that might disappear while further storing. However, there are no freshness related greenish or cereal notes and the overall profile is overall very nicely balanced and smooth.

Final product recommendation:

- As a single origin, medium roasted filter coffee
- As sweetness and balance providing component in a filter blend
- Suitable as a medium to dark roasted component providing sweetness and caramel notes in an Espresso blend when using at least 40%
