Brand-Based Shipping Guidelines

To ensure packaging standardization, origin traceability, and smooth customs processes, each container is shipped exclusively with products from a single origin.

Every shipment is managed for maximum efficiency, ensuring:

- Quality certification by batch.
- Clear documentation with no rework.
- Faster clearance with minimized risk of inconsistencies.

This way, each shipment can include the product selection best suited to your needs, while our team handles the complete logistics coordination, from cargo preparation to final dispatch monitoring.

More safety, more predictability, and much greater effectiveness for your imports.

Products are subject to availability. Images are for illustration purposes only, and information is provided by the manufacturers.

Carioba's Coffee

Carioba Agro-Trading operates as an international trading company specialized in the supply of premium Brazilian 100% Arabica coffee, sourced from the country's most established producing regions, including the Cerrado and Alta Mogiana. These origins are globally recognized for their favorable agroclimatic conditions, high-altitude cultivation, and consistent production of coffees with superior cup quality, balance, and aromatic complexity.

Our portfolio includes green and roasted coffee, processed and prepared in accordance with customer specifications and international quality standards. We work with Fine Cup classifications and standardized screen sizes of 15/16, 16+, and 17/18, ensuring uniformity, reliability, and consistency across all shipments. Green coffee is supplied in standard 60 kg bags, while roasted beans are packed in 5 kg bags, accommodating a wide range of commercial, logistical, and market requirements.

Sustainability, traceability, and supply chain transparency are core principles of our operation. Carioba Agro-Trading collaborates exclusively with trusted partners who adopt environmentally responsible and compliant production practices. This structured approach allows us to mitigate risks, ensure full traceability from origin to destination, and establish stable, long-term commercial partnerships, delivering export-ready coffee solutions aligned with international regulatory and market expectations.
